PNEUMATIC LIFT

PRODUCT CATALOG

COMPANY PROFILE

JIKE Technology Co.,Limited is your go-to source for extraordinary furnishings that breathe life into workplace interiors. We collaborate to design spaces that are as stunning as they are functional. Let us help you create an environment where furniture works as hard as you do.

Compared with electric table legs, pneumatic adjustable height table operate completely without electricity, and instead use gas cylinders that compress and expand when actuated to raise and lower the table surface. The motion is quick, smooth, and quiet as air. And pneumatic table frames move 8 times faster, not only can achieve a smooth height adjustment, but also there is no crank that rotates laboriously. When you want to raise the height of the table base, you only need to press the handle to raise the adjustable table frame. When you want to lower the table frame, you need to press the handle again and press the table down with your hand to lower the height of the table.

Pneumatic height adjustable table frames have fewer components than electric sit stand bases, so compared to the high damage rate of electric table motors, pneumatic table frames will have fewer repairs. Besides, due to the lack of an electric cord, pneumatic tables are not at risk for damage or considered a fire hazard, although electric tables are, to some degree.

As a full-service manufacturer, we proudly serve small, medium and large businesses, as well as organizations across the healthcare, hospitality, hotel and education sectors. We offer an extensive range of products and services tailored to meet your unique needs.

Ready to elevate your workspace? Contact us and discover how we can transform into a future office or restaurant darling with agile design.

P16 · PNEUMATIC DINING TABLE BASE SERIES

Experience improved posture, reduced back pain, and increased energy levels throughout the day. With pneumatic lift setting, our pneumatic lifting tables are perfect for use in hotels, home offices, and professional environments.

PNEUMATIC LECTERN SERIES

JXT's newest and most versatile lectern caters to multiple users in a variety of environments. It swiftly and quietly adjusts the height between 29" - 42.5", allowing users to comfortably sit or stand.

FEATURES

- Modern and professional design suits conference rooms, classrooms, and training areas.
- A modern handle provides simple and swift height adjustment.
- Single leg conserves space.
- Paper-stopping lip keeps materials and equipment in place.
- Casters allow easy transportation.
