JIKE[®]
TABLE BASE

ABOUT US

JIKE Table Base Co., Limited, with its headquarter located in Panyu District, Guangzhou, Ltd. was founded in the year of 2002. In order to meet the needs of development, established another new factory in Lechang in year 2017, which covers an area of more than 40,000 square meters, and currently has more than 300 employees. JIKE, with an integration of research and development, design, production and sales, is a furniture hardware manufacturing enterprise, which mainly produces cast iron table legs, stainless steel table legs, aluminum table legs, electroplated table legs as well as other indoor and outdoor table legs.

With four automatic open assembly lines of sculpting and box-closing, the company workshop is a modern manufacturing workshop that integrates styling, box-closing, pouring, cooling, returning and sand recycling. Each molding line is 30 meters long, and four molding lines together make 1200 models per hour. The molding workshop has several continuous sand mixers, which are able to deal with 40 tons sand per hour, making the annual production capacity of the workshop reach 100,000 tons. The advanced sand mixing system not only ensures the efficient production of the manufacturing lines, but also better controls the wet and dry strength, the air permeability, the effective clay content, the burning loss, the sand hardness, etc. of the sand, which strongly guarantees the company to produce high-quality products.

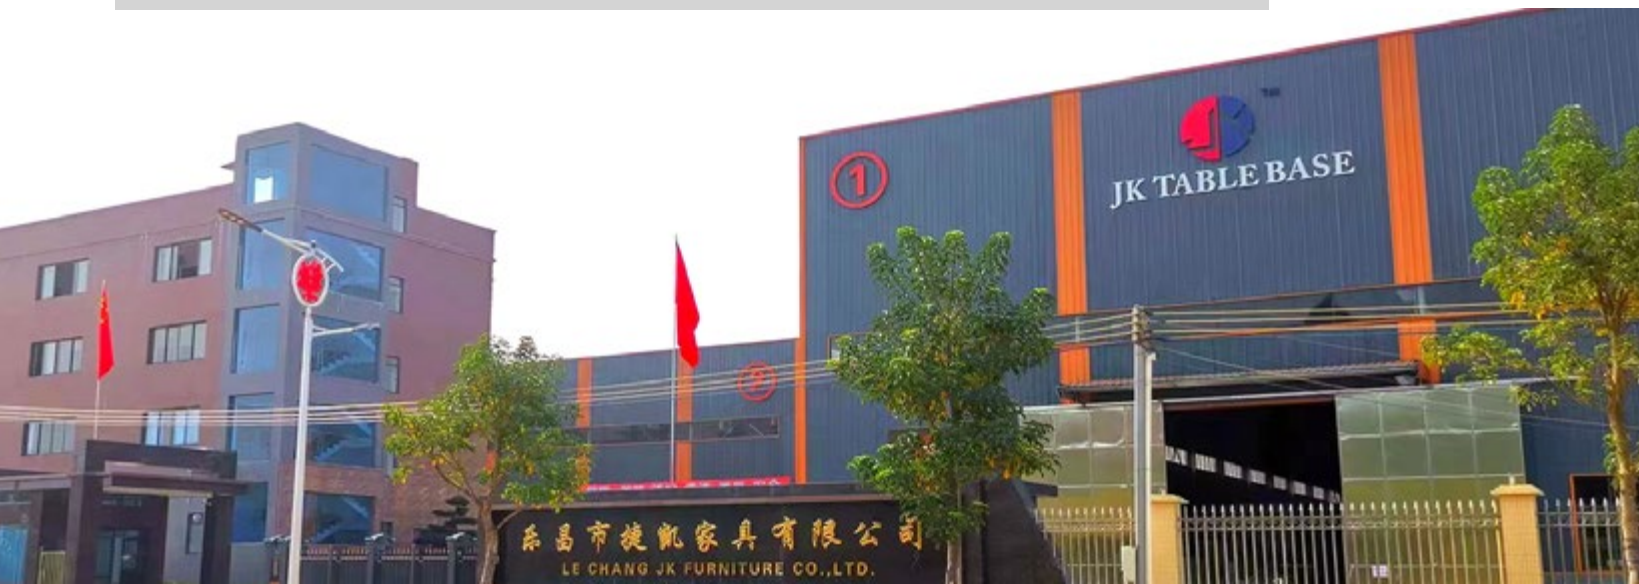

Adhering to its original mission, Jike has ingeniously focused on every detail of the product and devoted to make product with high quality. As the old saying goes, "To do a good job, one must sharpen one's tools." Therefore, Jike is not only equipped with automatic drilling and tapping machines, automatic grinder machines, automatic welding equipments, environmental-friendly automatic powder spraying line, but intelligent facilities including our unique laser cutting machines and hydraulic cutting machine. In addition, we have adopted automatic packaging machines and Robot automatically stack goods. These equipment help to improve the production efficiency several times and ensure the quality of the product.

Quality is the foundation of Jike. From intelligent surface dusting to accurate inspection and packaging, Jike has established a quality inspection system covering all operating processes, all of which have been implemented strict standard controls from beginning to end. JIKE Table Base, with its pursuit of excellence, aims at doing the best, and always produces product with high quality. With the results of the level, loading, anti-falling, and the adhesion of surface powder examination, Jike has become a customer trustworthy Top supplier.

Persisting for 17 years, Jike has won great respect and cooperated with a large number of customers. In today's intelligent production, we adhere to the principles of customer-oriented, people-oriented, and quality-oriented. We devoted ourselves to providing services with high quality, high efficiency as well as good credit. With such famous concept, our products are exported to Europe, the United States, Africa, the Middle East, Southeast Asia and other regions.

Since the establishment of Jike, our management team has been embracing dreams and passions, adhering to the philosophy of people-oriented and customer-oriented. Studying and innovating persistently, with acute thinking and prompt execution, to be a top-ranking enterprise has always been our goal. An effective and sophisticated management system; sharp and quick execution.

All the effort we make is to achieve a beautiful dream; All the cooperation we do is to maximize value and create a win-win situation; Our commitments to you are: your satisfaction is our unique goal; your appreciation is our great honor! The relationship between us is not simply a buyer and a seller; Instead, we are business partner and lifelong friends!

ALUMINUM TABLE LEGS SERIES

Renita

Code				
8046	69×H72cm	0.036	80x80/90cm	

- When storing the table legs, they can be stacked together, making more reasonable use of space. A newly designed lock catch has been added, which can be locked together by chains and is not easy to lose. The lock catch can be hung during normal use without affecting aesthetics.
- Adding anti-collision rubber between the legs of the table to avoid damaging the table during storage

Adding a hook between your handbag and hat not only saves space, but also makes your handbag safer in your view

Realizing Double Fold Switch Synchronization by adding the handle.

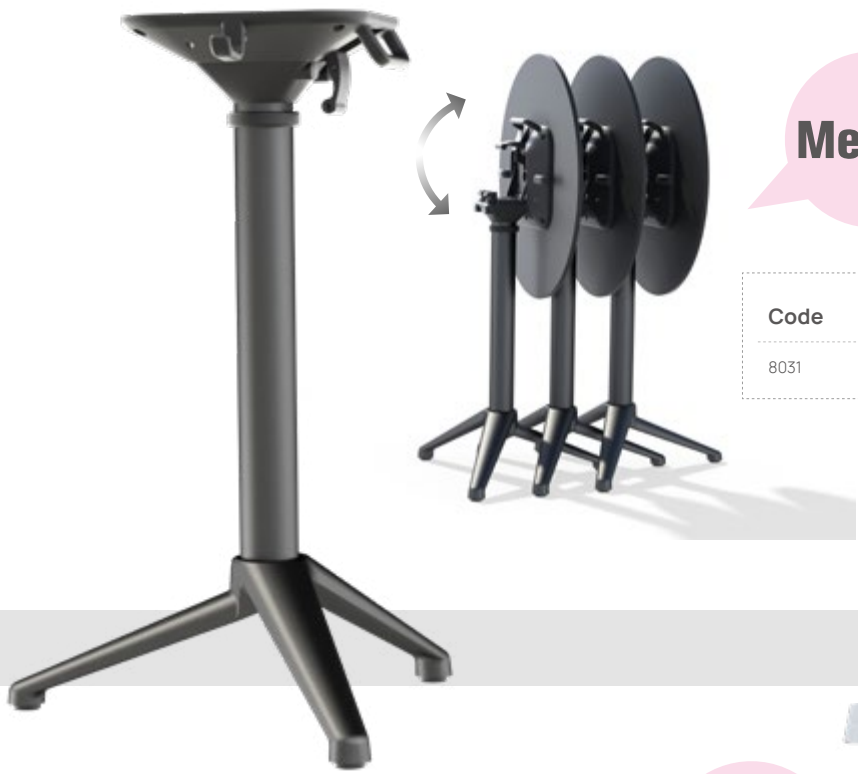

Code				
8047	92x57×H72cm	0.063	140x70cm	

Code

These innovative legs are perfect for those who want a table that can be easily stored and transported. They are made from high-quality aluminum, which means they are lightweight, durable, and resistant to rust and corrosion. Whether you're using them for a backyard barbecue, a business conference, or a family gathering, they will add a touch of class and sophistication to your event.

A photograph of an outdoor cafe or terrace area. In the foreground, there are several round wooden tables on white pneumatic legs, each with a dark brown upholstered chair. The ground is covered with green artificial grass. In the background, there is a brick wall, large glass windows reflecting the street, and several large patio umbrellas. A striped awning is visible on the right side. The overall atmosphere is modern and urban.
